SUMMARY

Experienced Senior Fullstack Software Engineer skilled in AWS, NestJS, JavaScript, ReactJS, Redux, Jest, mentoring and cross-team work. Seeking Full-time roles to utilize expertise in developing effective and scalable software solutions.

EXPERIENCE

Senior Fullstack Engineer

Keep

August 2023 – Present, Canada

- Owned the data aggregation process for data attribution within Marketing tools such as G-Ads, FB Business and LinkedIn Ads Improving Data attribution up to 90%.
- Conducted more than 30 technical interviews for the Fullstack and the Frontend roles.
- Member of the Data and Risk team, driving improvements in underwriting, compliance and approval processes, also former member of the Growth team, working on initiatives related to analytics, marketing strategy, and customer onboarding.
- Developed a system that allowed to run credit pulls from the applicants in batches; which allowed the company to assign more accurate credit limits to users, reducing risk and making the process more data-driven.
- Implemented 2FA; driving an adoption campaign that allowed to enforce security with the least amount of friction possible.

Ssr Advanced Fullstack Software Engineer

SunDevs

December 2022 – August 2023, Florida, Estados Unidos

- Development of an Automated Supplies Calculation module that reduced manual labour over 90% for Catering Agents over the client's business.
- Integration with a Payment Gateway Provider that reduced the Chargeback expenses up to 99.4%, using Address Verification System (AVS) to prevent fraudulent payments.
- Release into production a back-office platform for Call Center Agents which processes over 200k\$ per month in sales.
- Development of a Websockets Integration that allowed to reduce the Customer Purchase Cycle Time up to 40%.
